

Using Ingsoc logic the modern word German is a contradiction created before Ingsoc in earlier white supremacy which before white supremacy was unveiled as a hypocrisy. Supposedly formed from the traditional and historical Gerome, it was turned in an abberition and became Germain modeled on a Theosophical Charlatan called St Germain which carries with it an alcohol conspiracy.

Ingsoc Newspeak as we know are series of word contractions and their most important ones are contradictions intended to inflict psychological and physical harm on the proles. In Ingsoc, the proles are psychological slaves, falsely free, and must do what the state says.

And so using Ingsoc white supremacy logic we have discovered that the word German is an abberition of Gerome (or Jerome) once Deutchlands greatest Patriarch. The people of Gerome and the order of Gerome helped to found and establish many things, cities, monestaries, townships, Kingdoms in the ancient world much like religious orders and religious people have done throughout history.

The word is German is also Anglo Saxon in its formation with strong English and scholarly influence. The word is intended to reflect the Gerome (Jerome, St. Gerome) , an incarnation of God the Father and coincides with the name "Deutchland" the Land of God which has also been called the Land of the Father or "Father Land" and Germany has had great periods in history before white supremacy started and began breaking things down, and declining the value of religious history, declining the saints to the point of Nazi Germany. The Nazis were a true Christian hypocrisy but so were the Freemasons. German scholarship, and German military intelligence continued after World War II and Ingsoc became a big part of that,
